

BZ-2310 Dispersant

composition: polymer polyester modified compound

Appearance: Yellowish transparent liquid

Active: 100%

Application range: : industrial coating, wood coating, car coating, etc

Recommended dosage: titanium dioxide: 1-3%; organic pigment: 3-10%; carbon black: 20-40%; total amount: 0.1-0.5%

Usage: In order to obtain full effect, it is recommended to add it in two periods.

Features and advantages:

1. The titanium dioxide has excellent dispersion, good wetting and dispersion in industrial paint, good viscosity reduction, short dispersion time, no flocculation after uniform dispersion, and excellent whiteness of the dispersed titanium dioxide.
2. It has a good effect on the wetting and dispersion of various color paste pigments (such as red, phthalocyanine blue, phthalocyanine green, etc.) and fluidity.

Package: 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

Storage: keep away from heat source, light source and avoid light.

Precautions: carefully evaluate the specific amount in the coating system before use.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
