

## BZ-208 Dispersant

**Composition:** specially modified hydroxy ester **Composition:** specially modified hydroxy ester

**Appearance:** Pale yellow transparent liquid

**Active portion:** 100%

**Application range:** ink, PU coating, NC coating, industrial anticorrosive coating;

**Recommended dosage:** Full amount: 0.1-0.5%; inorganic pigment: 0.5-5%; organic pigment: 10-50%

**Usage:** In order to obtain full effect, please test the most appropriate amount before use, and add it before grinding.

### Features and advantages:

1. The dispersant belongs to the low molecular hydroxy acid type dispersant, with strong wettability and good dispersion.
2. It can significantly reduce the system viscosity of inorganic matter in organic matter and increase the filling amount.

**Package:** 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

**Storage:** keep away from heat source, light source and avoid light.

**Precaution**carefully evaluate the specific amount in the coating system before use.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
