

BZ-2432 Universal Dispersant

Composition: Nonionic compounds

Appearance: Yellowish transparent liquid

Active portion: 100%

Application range: industrial coating, wood coating, car coating

Recommended dosage: titanium dioxide: 1-3%; organic pigment: 3-10%; carbon

black: 60%; total amount: 0.1-0.5%

Usage: In order to get the full effect, it is recommended to add it in two periods.

Features and advantages:

1. Good wetting and dispersion of carbon black, excellent viscosity reduction, short dispersion time, no flocculation and return to coarseness after uniform dispersion.
2. It is versatile and can be used in both water and oil. It has a good effect on the wettability, dispersion and fluidity of various color paste pigments (such as red, phthalocyanine blue, phthalocyanine green, etc.).

Package: 25KG non-recyclable blue barrel.

The product is not completely used. The lid must be tightly closed after use.

Storage: keep away from heat source, light source and avoid light.

Precautions: Carefully evaluate before use and determine the dosage after testing.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
