

BZ-403A Acrylic Defoamer

Composition: Acrylate compound

Appearance: colorless to yellowish liquid

Active portion: 38%

Application range : solvent-based coating; light curing coating; solvent-free coating.

Recommended dosage: Total formula 0.1-0.6% (test the most appropriate dosage before use)

Usage: In order to obtain sufficient defoaming effect, it is recommended to add in two periods.

Features and advantages:

1. PE/PU general defoamer, strong effect of foam suppression and breaking, can eliminate bubbles in the tank;
2. It is especially suitable for the inhibition and breakup of Lan and Bai water reaction bubbles.
3. It is used for matte surface and primer to eliminate foam, which does not affect the heavy coating and adhesion, and will not produce shrinkage holes.

Package: 25KG/180KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

Storage: keep away from heat source, light source and avoid light.

Precautions: Carefully evaluate the effects on solubility and crater before use.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
