

BZ-5300 Universal Defoamer

Composition: Modified silicone compound

Appearance: colorless transparent to yellowish liquid

Non-volatile matter: 0.6%

Application range : solvent based coating, light curing coating, solvent free coating.

Recommended dosage: Total formula 0.1-0.8% (test the most appropriate dosage before use)

Usage: In order to obtain sufficient defoaming effect, it is recommended to add before grinding. If added later, mix under a sufficiently high shear force to ensure good distribution of the defoamer.

Features and advantages:

1. It has excellent defoaming and foaming inhibiting effect, which can suppress and eliminate the bubbles produced in the process of production, canning and construction of coatings, and prevent the occurrence of pinholes.
2. Good solubility with various resin systems, especially suitable for medium and high polarity clear varnish system.

Package: 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

Storage: keep away from heat source, light source and avoid light.

Precautions: Carefully evaluate the effects on solubility and crater before use.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
