

BZ-481 Powerful defoamer

composition: Alcohol modified organic silicon compounds

Appearance: colorless transparent liquid

Active portion: 10%

Application range: : used for roll coating, UV, epoxy, thick paint coating.

Recommended dosage: Total formula 0.1-0.8% (test the most appropriate dosage before use)

Usage: It can be added at any time during the production process, including after addition. Please stir evenly and test before use.

Features and advantages:

1. Suitable for deep wood grain coating of PE and PU white surface, with outstanding release for bubbles in deep hole wood grain.
2. It has good bubble elimination performance for thick coating such as epoxy and UV.
3. Especially in mechanical movement, roll coating and spray coating have special effect of foam suppression and foam removal.

Package: 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

Storage: keep away from heat source, light source and avoid light.

Precautions: Carefully evaluate the effects on solubility and crater before use.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
