

BZ-420 Special Defoamer

Composition: special polymer compounds

Appearance: colorless or yellowish liquid

Active ingredients: 100%

Application range: Suitable for: solvent-based coatings; Recommended for: light curing coatings, solvent-free coatings;

Recommended dosage: Total formula 0.02-0.8%

Usage: Can be added at any time.

Features and advantages:

1. The defoaming effect on the bubbles generated by liquid polyurethane reaction is very significant.
2. It can suppress and eliminate the bubbles produced during the manufacturing and stirring of the coating.
3. Good solubility, can eliminate the fish eye, pinhole, crater and other defects of the paint film, especially suitable for clear varnish.

Package: 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

Storage: Keep away from heat source, fire source and light.

Precautions: Carefully evaluate the effects on compatibility and pinholes before use.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
