

BZ-6800A Epoxy Defoamer

Composition: Silicone defoaming polymer

Appearance: Milky white liquid

Active ingredients: 100%

Application range: Solvent based coating; Light curing coating, Solvent free coating.

Recommended dosage: Total formula 0.1-1.0% (test the most appropriate dosage before use)

Usage: In order to obtain sufficient defoaming effect, it is recommended to add before grinding. If added later, it should be mixed under a sufficiently high shear force to ensure the defoaming effect.

Features and advantages:

1. It has excellent defoaming and foam suppression effect, which can inhibit and eliminate the bubbles produced in the production, canning and construction process of two-component epoxy coating, and also has a significant effect on the elimination of bubbles in high viscosity ink.
2. Used in epoxy system, it has a good defoaming effect on epoxy roll coating.

Package: 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

Storage: keep away from heat source, light source and avoid light.

Precautions: Carefully evaluate the effect on solubility and crater before use.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
