

## BZ-603 Acrylic leveling agent

**composition:** Polypropylene acid solution

**Appearance:** Pale yellow transparent liquid

**Active portion:** 50%

**Application range:** Solvent coating, Light curing coating, Coil coating, Can coating, Industrial baking paint

**Recommended dosage:** Total formula 0.1-1%

**Usage:** Can be added at any time in the production process, please test before use.

### Features and advantages:

1. It has low surface tension and good solubility, which can reduce the surface tension between the coating substrate and solve the shrinkage and orange peel phenomenon caused by the increase of coating viscosity.
2. It can also improve the wetting and anti-foaming effect on the substrate for high temperature paint.

**Package:** 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

**Storage:** keep away from heat source, light source and avoid light.

**Precautions:** Please carefully evaluate before use, and the requirements must be tested to determine.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
