

BZ-658 Acrylic leveling agent

Composition: Acrylate polymer

Appearance: Colorless to yellowish transparent liquid

Active: 50%

Application range: solvent-based coating, wood coating, light curing coating, car paint, industrial baking paint

Recommended dosage: Total formula 0.1-1.5% (test the most appropriate dosage before use)

Usage: can be added at any time in the production process, including after addition, please stir evenly, please test before use.

Features and advantages:

1. Low surface tension, good solubility, can reduce the surface tension between the coating substrate, anti-penetration;
2. For high temperature baking paint, it can also improve the wetting and defoaming of the base material, and do not affect the interlayer adhesion.

Package: 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

Storage: Keep away from heat source, fire source and light.

Precautions: Please carefully evaluate before use. It is suitable for matte, primer and bright light.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
