

BZ-633 Polyether Modified Leveling Agent

Composition: polyether modified silicone polymer

Appearance: Pale yellow transparent viscous liquid

Active portion: $\geq 98\%$

Application range: Solvent coating, Industrial coating, Wood coating, Car coating

Recommended dosage: Total formula 0.05-0.8% (test the most appropriate dosage before use)

Usage: can be added in the early or late stage of production, please stir evenly, please test before use.

Features and advantages:

- 1、 It is versatile, reduces the surface tension of paint and printing ink, and improves the wettability of substrate.
- 2、 Fast leveling speed, excellent anti-puncture effect, increase surface smoothness and gloss.

Package: 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

Storage: keep away from heat source, light source and avoid light.

Precautions: Please carefully evaluate before use, and the best requirements must be determined after testing.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
