

BZ-833 Leveling agent

Composition: Polyether modified silicone

Appearance: Colorless transparent liquid

Active portion: 100%

Application range: UV coating, industrial coating, Wood coating, Car coating ink

Recommended dosage: Total formula 0.01-1.0% (test the most appropriate dosage before use)

Usage: can be added at any time in the production process, please test before use.

Features and advantages:

1. Excellent solubility with various resin systems, fast leveling speed, and increased surface smoothness and gloss.
2. Reduce the surface tension of paint and ink, improve the wettability of substrate and excellent anti-puncture performance.
3. Contains propyl ester functional group, so that it can show the characteristics of bifunctionality in the non-aqueous and radiation curing adhesive system, with a wide range of applications and flexibility.

Package: 25KG /180KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

Storage: keep away from heat source, light source and avoid light.

Precautions: Please carefully evaluate before use, and the best requirements must be determined after testing.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
