

# BZ-650 Polyether Modified Leveling Agent

**composition:** alkyl modified polysiloxane compound

**Appearance:** yellowish transparent viscous liquid

**Active portion:**  $\geq 99.8\%$

**Application range:** solvent coating, light curing coating, industrial coating, ink

**Recommended dosage:** Total formula 0.1-0.6% (test the most appropriate dosage before use)

**Usage:** can be added at any time in the production process, please test before use.

## Features and advantages:

1. Universal, water and oil universal, improve the fluidity, transparency, smoothness, anti-puncture effect, anti-adhesion, peeling effect of clear varnish;
2. Good recoatability, improved scratch resistance, minimal impact on interlayer adhesion, and smooth hand feel can be provided.

**Package:** 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

**Storage:** keep away from heat source, light source and avoid light.

**Precautions:** Please carefully evaluate before use, and the best requirements must be determined after testing.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
