

# BZ-651 Polyether Modified Leveling Agent

**Composition:** Polyether modified siloxane polymer

**Appearance:** Colorless to yellowish transparent liquid

**Active content:** 50%

**Application range:** Solvent coating, Industrial coating, Wood coating, Ink

**Recommended dosage:** Total formula 0.1-0.8% (test the most appropriate dosage before use)

**Usage:** can be added at any time in the production process, please test before use.

## Features and advantages:

- 1、 It is well soluble with most resins, has excellent leveling effect and reduces surface tension.
- 2、 Good wettability of the substrate can prevent the formation of surface defects such as shrinkage or fish eyes.

**Package:** 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

**Storage:** keep away from heat source, light source and avoid light.

**Precautions:** Please carefully evaluate before use, and the best requirements must be determined after testing.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
