

W-11B Handfeel Wax Liquid

Composition: Modified wax mixture

Appearance: Milky white turbid liquid

Active portion: 50%

Application range: Solvent based coating, Light curing coating, Polyurethane coating

Recommended dosage: Total formula amount 0.3-0.5%

Usage: can be added at any time in the production process, please test before testing.

Features and advantages:

It is a modified wax with super dry touch, good transparency and long lasting touch. It can eliminate hand sweat, improve the wear resistance and scratch resistance of the paint film, and does not affect the leveling. It is especially suitable for high-grade matte furniture paint.

Package: 25KG non-recyclable blue barrel.

The product has not been used completely. After use, the inner and outer covers must be tightly closed.

Storage: keep away from heat source, fire source and light.

Precautions: Please carefully evaluate before use. It is suitable for matte furniture paint and bright light. If used for acrylic resin, test its compatibility.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
