

BZ-623 Handfeel agent

Composition: Wax modified silicone oxygen

Appearance: Colorless transparent liquid

Active portion: 50%

Application range: Solvent coating, Light curing coating, Polyurethane coating, Nitrocellulose coating

Recommended dosage: Total formula 0.1-0.8% (test the most appropriate dosage before use)

Usage: can be added at any time in the production process, please test before use.

Features and advantages:

- 1、Improve the arrangement of dull powder in the matting coating, improve the coating film and the wettability of pigment.
- 2、It has obvious hydrophobicity and can effectively suppress the generation of bubbles, prevent shrinkage holes, boiling water marks, dark bubbles, orange peel and spray blooming on the surface of the coating film.
- 3、Improve the anti-slip resistance of the coating, and provide a wet and smooth hand feel.

Package: 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

Storage: keep away from heat source, light source and avoid light.

Precautions: Carefully evaluate the effects on solubility and crater before use.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
