

## BZ-627 Leveling handfeel agent

**Composition:** Specially modified polysiloxane

**Appearance:** Colorless transparent liquid

**Active portion:** 100%

**Application range:** Solvent-based coating, Light curing coating, Polyurethane coating

**Recommended dosage:** Total formula 0.05-0.5%

**Usage:** can be added at any time in the production process, please test before use.

**Features and advantages:**

- 1、It has the advantages of enhancing surface feel, improving leveling, improving gloss, and improving the wettability to the substrate, and has a strong versatility.
- 2、Good resin solubility, excellent leveling effect, can prevent and eliminate orange peel, shrinkage, pinhole and other paint film defects, anti-scratch;
- 3、It has high temperature resistance and can not be degraded at 300°C. In the oven, there will be no surface defects caused by decomposition of silicone.

**Package:** 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

**Storage:** keep away from heat source, light source and avoid light.

**Precautions:** Please carefully evaluate before use. It is suitable for matte furniture paint, but also can be used for bright light.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
