

BZ-628B Smooth Handfeel Agent

Composition: Modified polydimethylsiloxane

Appearance: Colorless to light yellow transparent liquid

Active portion: ≥98%

Application range: Solvent coating, Light curing coating, Industrial paint, Rubber paint;

Recommended dosage: Total formula 0.1-0.5% (test the most appropriate dosage before use)

Usage: can be added at any time in the production process, please test before use.

Features and advantages:

1. Super strong to enhance surface smoothness, improve leveling, improve gloss, and can improve the wettability of the substrate.
2. It is versatile and has good solubility with resin, so it can be applied to various solvent systems.

Package: 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

Storage: keep away from heat source, light source and avoid light.

Precautions: Carefully evaluate the effects on solubility and crater before use.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
