

BZ-551 Polymer Emulsion Handfeel Agent

Composition: Super high molecular weight modified polysiloxane emulsion

Appearance: Milky white liquid

Active portion: 50%

Application range: Water wood paint, Water plastic paint, Water metal coating, Water ink and so on;

Recommended dosage: Total formula 0.3-2.0% (test the most appropriate dosage before use)

Usage: Add directly or add to the system after dilution with water to ensure uniform dispersion.

It can be added to the formulation system at any stage of grinding, dispersion and paint mixing.

Features and advantages:

1. BZ-551 is a modified ultra-high molecular weight polysiloxane emulsion, which has the advantages of safety, environmental protection and no solvent.
- 2, excellent smoothness, anti-sticking, can reduce the friction coefficient, improve wear resistance.
3. Good hydrophobicity and gloss.

Package: 25KG non-recyclable blue barrel.

The product is not completely used. The lid must be tightly closed after use.

Storage: keep away from heat source, light source and avoid light.

Precautions: Carefully evaluate the specific amount in the system before use.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only.
