

## T-12 Drier

**Composition:** High activity organotin compounds

**Appearance:** Colorless or pale yellow liquid

**Tin content:** 18%

**Recommended dosage:** Total formula amount 0.1-0.8%

**Features and advantages:**

1. The catalyst is an organic tin type drying agent, which has high reactivity and is mostly used in the formulation of polyisocyanurate reaction.
2. The product has good thermal stability and has no effect on paint storage.
3. The product is used to accelerate the dryness of the primer and shorten the packaging and bonding time of the coated object.

**Package:** 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

**Storage:** keep away from heat source, light source and avoid light.

**Precautions:** Carefully evaluate the specific amount in the system before use.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
