

# Winter Treasure Drying Agent

**Composition:** Organic amine compounds

**Appearance:** Colorless or pale yellow liquid

**Active content:** 100%

**Recommended dosage:** Primer: 0.1-0.5%; topcoat: 0.05-0.6%

**Features and advantages:**

1. As a high strength and active catalyst, the amount of it is small in the formula, the reaction is fast and the crosslinking is stable. It can accelerate the grinding of the primer, and accelerate the dryness of the topcoat, shorten the packaging and bonding time of the coated object.
2. The drying time is several times that of organic tin, and the stability is good, which does not affect the anti-sinking, and there are almost no side effects.

**Package:** 140KG non-recyclable iron barrel.

The lid must be tightly closed after use if the product is not completely used.

**Storage:** keep away from heat source, light source and avoid light.

**Precautions:** Carefully evaluate the specific amount in the system before use.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
