

BP-100 Adhesion promoter

Composition: Silane coupling

Appearance: Colorless to pale yellow clear liquid

Active content: 100%

PH value: 7

Application range: Glass, PVC, Wood surface treatment.

Usage and dosage: For resin solid 1-2%; for epoxy coating, it must be added to the curing agent;

Other systems are mixed with resin first, and the total amount is 0.1-1%.

Features and advantages:

1. Improve the adhesion of air dry coating to difficult to adhere substrates.
2. The adhesion is significantly improved, and its water resistance, corrosion resistance and salt resistance are excellent.
3. It is more suitable for adhesives, elastomers, sealants, inks, etc., to improve the excellent adhesion for a long time.

Package: 25kg non-recyclable blue barrel.

The inner and outer covers must be tightly closed after use if the product is not completely used.

Storage: keep away from heat source, fire source and light.
