

BZ-1000B Anti-oil Agent

Composition: Nonionic silicone

Appearance: Transparent and clear liquid

Active content: 100%

Application range: Plastic paint, Machine shell paint, Hardware baked paint, Ink

Recommended dosage: Total formula amount 0.05-0.5%

Usage: can be added in the later stage of paint making, please test before use.

Features and advantages:

1、 When the substrate is contaminated with silicone oil or grease, it will cause problems in surface paint coating (poor adhesion, pinholes, volcanic craters, etc.)

Anti-oil agent can effectively solve the problem of coating.

2. Excellent leveling, smoothness and other characteristics.

Package: 25KG non-recyclable blue barrel.

The lid must be tightly closed after use if the product is not completely used.

Storage: keep away from heat source, light source and avoid light.

Precautions: Carefully evaluate and test its solubility before use.

The above information is based on the product situation. Due to different producer formula, production process and construction conditions, the above statement is for reference only. The company does not assume any legal responsibility, please test the dosage before use. The company reserves the right to improve its products and any changes in specifications will not be notified in advance.
